## **Trinity Announces Five New Myridas<sup>®</sup> Distribution Software Modules for Microsoft Business Solutions – Great Plains**

**Stockport, UK** – 30<sup>th</sup> May 2003 – Trinity Computer Services Ltd today announced the release of five new Myridas<sup>®</sup> distribution software modules for Microsoft<sup>®</sup> Business Solutions – Great Plains. These new modules complement and extend the range of Myridas<sup>®</sup> software produced by Trinity. The five new modules, which have been optimised for Great Plains software V7.5, include Distribution Enhancements; Extended Pricing Enhancements; Price Negotiation; Reserved Stock & Sales Pattern Analysis. In addition, Trinity has also updated many of the existing Myridas software modules with new distribution features to coincide with the Great Plains V7.5 release.

“These new software modules bring a range of distribution functionality features to our customers and our business partners”, said Carl Bolus, Sales and Marketing Director for Trinity. “As a Microsoft Business Solutions developer partner specialising in the Distribution vertical market, our goal is to continue producing high-quality software like this, which augments the capabilities of the Great Plains edition software to meet the often very specific needs of wholesale distributors”.

The Myridas<sup>®</sup> suite provides a wide range of functionality that together with Microsoft Business Solutions - Great Plains gives a complete business solution for the wholesale distribution sector. Other modules include Additional Charges, Consolidated Invoicing, Call Scheduling and Vehicle Load Scheduling applications. Fully integrated with Great Plains Edition software, these applications are available to other Microsoft Business Solutions reselling channel partners through Trinity’s own partner program.

**Editor's Information:**

Established in 1975, Trinity Computer Services is a software developer and reseller that provides application software systems that support the business processes and information needs of wholesale distributors. Working closely with its customers, Trinity quickly evolved to be a leader in this sector, a position attained through a comprehensive understanding of specific business requirements and industry trends. Trinity customers include major UK distribution organisations such as Interbrew, Matthew Clark Wholesale, Corporate Express and Scottish Courage.

A believer in continual product development and innovation, Trinity has a comprehensive portfolio of established distribution products which include DrinkMaster Plus, FoodTrader Plus, Trader Plus and an e-commerce solution, TrinityNet. Committed to offering new and innovative solutions, Trinity became a Microsoft Business Solutions solution developer and reselling partner in order to develop and supply Trinity's new generation of distribution systems, Myridas<sup>®</sup> Solutions.
