Press Release No: 878

# **Trinity Release New Myridasä Modules At Microsoft Great Plains European Conference**

Trinity Computer Services Ltd announced the release of three new Myridas™ modules at the Microsoft Great Plains European Conference, 12<sup>th</sup> – 15<sup>th</sup> June, 2001.

Over the past 12 months Trinity have already released 6 modules, which are designed to extend the functionality of the Microsoft Great Plains Distribution Series. These Myridas™ modules include Customer Templates, Advanced Distribution, Pricing, Customer Call Scheduling, Vehicle Load Planning and Available To Promise. The series of modules have generated considerable interest from Microsoft Great Plains Partners all over the world, with sales into wholesale distribution sectors. In June 2001, Trinity announced the sale of their Pricing Application to Microsoft Great Plains, who will be including Advanced Pricing functionality as an add-on application to its eEnterprise Inventory Control application within the Distribution Series.

Trinity's new Myridas™ modules include:

**Advanced Picking Routines:** Provides the means for individual sites to configure picking methods to meet their own business requirements, including consolidated picking and pick lists in bin / bay sequence.

**Additional Charges:** Enables users to create relationships between items so that additional charges lines are generated automatically by the system, ideal for deposits, spares kit and support charges.

**Item Life Cycle:** Enables the user to assign a 'status' to each item using the standard Microsoft Great Plains window, that will control when an item can be bought and sold.

The complete Myridas™ suite will be demonstrated at the Microsoft Great Plains European Conference, June 2001 and also at Stampede, October 2001. Additional information, including software downloads, is available on [www.trinitycomputers.co.uk](http://www.trinitycomputers.co.uk).

**-Editors Information-**

Established in 1975, Trinity Computer Services develops application software systems that support the business processes and information needs of wholesale distributors. Working closely with its customers Trinity quickly evolved to be a leader in this sector, a position attained through a comprehensive understanding of specific business requirements and industry trends. Trinity customers include major UK distribution organisations such as Interbrew, Matthew Clark Wholesale, Corporate Express and Scottish Courage.

A believer in continual product development and innovation, Trinity has a comprehensive portfolio of established distribution products which include DrinkMaster Plus, FoodTrader Plus, Trader Plus and the more recently introduced e-commerce solution, TrinityNet. Committed to offering new and innovative solutions, Trinity became a Microsoft Great Plains Solutions Developer and Partner in order to develop and supply Trinity's new generation of distribution systems, Myridas™ Solutions.
