Press Release No: 887

## **Trinity Announces New Functionality For Microsoft Business Solutions – Great Plains Edition**

**Manchester, UK** – 12<sup>th</sup> November 2003 – Trinity released Myridas<sup>®</sup> 7.7 distribution modules extending the distribution functionality of Microsoft Business Solutions – Great Plains Edition software.

This latest release contains enhancements to 10 existing Myridas modules and two new distribution modules:

**Front Counter:** This module provides functionality that allows companies who offer self collection and cash sales counter services at their premises to process these orders on their Great Plains system at the point of sale. Supported by cash till, cash draw and bar code scanner integration, these transactions automatically update current inventory levels as sales are made.

**Purchase Retrospective Discounts:** This module enables the user to set up purchase retrospective discount vendors. Using criteria such as product volume or turnover, individually specified discount parameters and specified time periods, discount plans are automatically updated as transactions are processed.

Myridas 7.7 is the latest in an impressive product development program, totalling 28 separate modules that enhance the distribution functionality of Great Plains Edition software.

The standard of the Myridas module suite is reflected in the recent sale of three modules to MBS, which are now sold as part of Great Plains Edition 7.5.

Les Williams, CEO comments, “ Trinity follow an aggressive product development program, constantly extending and enhancing the distribution functionality of Great Plains Edition software. Continuous product development enables us to meet the requirements of our customers within distribution and provide our partners with the functionality they require to sell into distribution effectively.”

More product information about the new and existing Myridas modules is available on the Trinity website, [www.trinitypartner.com](http://www.trinitypartner.com).

**Editor's Information:**

Established in 1975, Trinity Computer Services is a software developer and reseller that provides application software systems that support the business processes and information needs of wholesale distributors. Working closely with its customers, Trinity quickly evolved to be a leader in this sector, a position attained through a comprehensive understanding of specific business requirements and industry trends. Trinity customers include major UK distribution organisations such as Interbrew, Matthew Clark Wholesale, Corporate Express and Scottish Courage.

A believer in continual product development and innovation, Trinity has a comprehensive portfolio of established distribution products which include DrinkMaster Plus, FoodTrader Plus, Trader Plus and an e-commerce solution, TrinityNet. Committed to offering new and innovative solutions, Trinity became a Microsoft Business Solutions solution developer and reselling partner in order to develop and supply Trinity's new generation of distribution systems, Myridas<sup>®</sup> Solutions.
