Press Release No: 875

### **Trinity launches Myridas Partner Program in the UK – Jan 2001**

Myridas Partner Program unveiled at Great Plains UK Partner Conference, December 4-5, 2000

Trinity was proud to launch the Myridas Partner Program in the UK at the Great Plains partner conference in London on 4<sup>th</sup> December. The program, open to all Great Plains Partners, is a re-seller opportunity for organisations involved in the provision of business systems in the distribution marketplace.

The Myridas product range, developed by Trinity over the last year, is a suite of software modules that support and extend the Great Plains Distribution Series of software within their Dynamics and eEnterprise products. To ensure the smooth integration of Myridas with the Great Plains environment, the Myridas software modules have been developed with Dexterity, Great Plains own development tool. Offering user enhancements and additional distribution specific functionality, Trinity have extended and transferred their own distribution expertise and made it available to users of Great Plains.

In bringing the Myridas software modules to market, Trinity's launch of the Myridas Partner Program signifies a new channel strategy for the company. "This is an exciting time for Trinity", explains Carl Bolus, Sales and Marketing Director for Trinity. "Great Plains has added a new depth of technological capability to our organisation, enabling us to offer new products and benefits to users in our markets. But as well as this, we have created an opportunity for other Great Plains partners to draw upon Trinity's expertise in distribution. This new channel will open up new markets for Trinity's products, enabling Great Plains partners to offer their customers exciting new distribution features and benefits that they haven't had before. Here at Trinity we're looking forward to a fruitful relationship with all of our new partners".

The complete Myridas™ suite will be demonstrated at the Microsoft Great Plains European Conference, June 2001 and also at Stampede, October 2001. Additional information, including software downloads, is available on [www.trinitycomputers.co.uk](http://www.trinitycomputers.co.uk).

- Editors Information-

Established in 1975, Trinity Computer Services develops application software systems that support the business processes and information needs of wholesale distributors. Working closely with its customers Trinity quickly evolved to be a leader in this sector, a position attained through a comprehensive understanding of specific business requirements and industry trends. Trinity customers include major UK distribution organisations such as Interbrew, Matthew Clark Wholesale, Corporate Express and Scottish Courage.

A believer in continual product development and innovation, Trinity has a comprehensive portfolio of established distribution products which include DrinkMaster Plus, FoodTrader Plus, Trader Plus and the more recently introduced e-commerce solution, TrinityNet. Committed to offering new and innovative solutions, Trinity became a Microsoft Great Plains Solutions Developer and Partner in order to develop and supply Trinity's new generation of distribution systems, Myridas™ Solutions.
