

Trinity & Great Plains Distribution Flyer

This document would open up in cross format – in the following order:

1
Let's imagine a
distribution management
system which would...

2
integrate tightly
with purchasing, for
end-to-end financial
control...

3
...not to mention controlling
inventory, managing returns
and tracking contracts;

4
...effortlessly automate
your sales orders,
receivables and invoicing...

5
...and give you a flying start in
exploiting the power of e-business.

e.Commerce
The quick and simple way to create your Internet storefront, integrated seamlessly with your eEnterprise management system to make sure that customer, inventory and pricing information are always up-to-date.

e.Order
The out-of-the-box Internet business-to-business storefront that integrates seamlessly with your eEnterprise management system. Customers and sales people can enter orders themselves, and view progress on-line.

e.Requisition
The purchase requisition entry and approval system that eliminates the need for paper-based requisitions. Integrated with Purchase Order Processing.

How's that for imagination?

Microsoft Great Plains eEnterprise: the definitive integrated business management system.

Available NOW, from
Trinity Computer Services Limited.

TRINITY

Trinity is an organisation dedicated to the provision of business application software for distributors. As a Microsoft Great Plains partner, Trinity uses eEnterprise Distribution Series at the core of its own Myridas™ distribution solutions. The combination of advanced technology from Microsoft Great Plains, along with Trinity's distribution expertise, provides for a synergy that helps to bring life to powerful distribution systems.

Don't just imagine it. Release the power of your system today.

Inventory Control

Firm control of inventory and pricing, for firm control of your business and its profitability. You can implement sophisticated pricing and item tracking systems, monitoring receipts, disbursements and transfers throughout your organisation – from the desktop.

- Unlimited items, unlimited sites
- Rapid, multi-level customisation
- Online item tracking

Returns Management

Streamlining the complicated returns and repairs process to support high volume repairs and rapid turnaround for enhanced customer service.

- Flexible set-up options
- Rapid transaction entry processes
- Integrated with eEnterprise Service Management and Financials

Contract Administration

All the tools you need to manage complex, multi-tiered contracts, quotations and warranties, for maximum service revenue.

- Pinpoint renewable contracts and analyse profitability
- Built-in reporting, enquiry and billing tools

[eENTERPRISE DISTRIBUTION SERIES]

[eENTERPRISE DISTRIBUTION SERIES]

Sales Order Processing

The comprehensive solution for distribution, retail, service and light manufacturing organisations, Microsoft Great Plains eEnterprise Sales Order Processing delivers multi-departmental order processing workflow.

- Superb flexibility in defining order processes
- Streamlined, easy-to-use transaction entry window
- Renowned eEnterprise drill-down analysis and reporting functions

Invoicing

A rich, full-featured invoicing environment for managing inventory and customer accounts, via a single-window invoice processing workflow.

- Rapid customisation and flexible invoice processing
- Integrated with Receivables Management and Inventory Control

Receivables Management

Comprehensive, intelligent transaction processing for sales, payments, returns, debit and credit memos, repairs, warranties, finance charges and scheduled payments.

- Built-in customisation, user-defined routines, flexible reporting
- The intuitive interface between your financials and your customer
- Effortless multicurrency capability

[eENTERPRISE PURCHASING SERIES]

Purchase Order Processing

Automates the issuing of purchase orders and the receipt of ordered goods, to provide complete cost accountability.

- Integrated with eEnterprise Payable Management for instantly-available vendor information
- Single-window purchase order entry and editing
- Flexible receivings capabilities
- Sophisticated drill-down and enquiry options

Bill of Materials

A superior solution for tracking components and sub-assemblies for tighter process management, cost control and materials scheduling.

- Direct integration with Inventory Control means that Sales know when they have quantities to sell, and Purchasing know when to order new materials.

a family of world-class products and services providing new levels of strategic control for business

Microsoft Great Plains Business Solutions provides e-business management solutions that interconnect businesses with their trading communities.

140,000 businesses in 132 countries count on Microsoft Great Plains' Customer Driven Management applications for financials, distribution, enterprise reporting, project accounting, electronic commerce, human resources, manufacturing, sales and marketing, customer service, supply chain and support.
